

COURSE AND EQUIPMENT OVERVIEW

| Electrical fundamentals | Electronics | Digital electronics and microcomputer technology | Building management systems | Power electronics | Communication technology | Measurement technology | Automation | Automotive technology | Automotive technology | Automotive technology | Basic equipment and accessories |
|--|--|---|--|---|---|--|---|---|---|--|--|
| DC technology CO4204-4D | Semiconductor components CO4204-5A | Gates and flip-flops CO4204-6A | Protective measures and power network types CO4204-4M | Self-commutated power converters CO4204-7M | Quadrupoles and filters CO4204-9A | Measurement of electric values V/I/P/cos-phi/f CO4204-8A | Fundamentals of PLC technology CO4204-8M | DC and AC circuits in vehicles CO4204-7A | LIN bus CO4204-7E | Lidar system in motor vehicles CO4205-1E | Basic equipment |
| AC technology CO4204-4F | Transistor multivibrators CO4204-5D | Sequential circuits CO4204-6C | Control systems / protective circuitry CO4204-4N | Line-commutated power converters, 3-phase CO4204-7N | Active filters with operational amplifiers CO4204-9B | Measurement of non-electric values temp./pressure/force CO4204-8B | PLC model lift application CO4204-8T | Electronics and digital technology in vehicles SO4204-7B | CAN bus CO4204-7K | Gesture control and capacitive touchscreen in the motor vehicle CO4205-1U | UniTrain interface |
| Three-phase technology CO4204-4H | Transistor and amplifier technology CO4204-5H | Application circuits CO4204-6E | LED lighting and colour detection CO4204-4P | Frequency converter drives CO4204-7P Requires CO4204-7M and CO4204-7T | Coaxial cables SO4204-9G | Measurement of non-electric values displacement/angle/speed CO4204-8C | Sensors for automation CO4204-8U | Automotive electrical fundamentals CO4205-1G | CAN FD in automobiles CO4205-1S | Rear view camera with park assist CO4205-1C | UniTrain measurement accessories (shunts, jumpers and connection cables) |
| Magnetism/ electromagnetism CO4204-4A | Field-effect transistors CO4204-5K | Converter circuits CO4204-6B | | Active power factor correction (PFC) CO4204-7Q | Signal transmission via optical fibres 650 nm / 820 nm CO4205-4E | RLC measurements CO4204-8D | Basics robot technology CO4204-3Q | PWM signals in automotive engineering CO4204-7J | Ethernet in motor vehicles CO4205-1A | Traffic sign recognition with speed control CO4205-1B | Required accessories |
| Conducting measurements with the multimeter CO4204-4B | Operational amplifiers CO4204-5M | Fundamentals of computer technology CO4204-6H | | | Signal transmission via optical fibres 1300 nm CO4205-4F | | | Alternator / 3-phase generator CO4204-7D | 48V sub-systems in on-board vehicle networks CO4205-1T | ACC with Emergency Brake Assist CO4205-1V | Depending on the course one or more UniTrain experimenters are required. |
| Electrical network analysis CO4204-4C | Power semiconductor devices CO4204-5P | Supplement to CO4204-6H Applications and programming CO4204-6J | | | | | | Sensors in motor vehicles CO4204-7F | Optical data buses for automotive applications CO4204-7H | | UniTrain experimenter (quantity) |
| Electromagnetic compatibility (EMC) CO4204-4K | Analog power supplies CO4204-5R | EloTrain 2-mm plug-in system | Electrical power engineering | Electrical machines | 4-wire lines SO4204-9F | Automatic control technology | Pneumatics /hydraulics | Pulse generation and ignition systems CO4204-7C | FlexRay CO4204-6Y | | Basic equipment EloTrain 2-mm plug-in system |
| Measurements using an oscilloscope CO4204-4L | Switched-mode power supplies CO4204-5S | Introduction to digital technology SO4206-1F | Photovoltaics CO4204-3A | DC machines CO4204-7R | Pulse modulation methods PAM/PCM/Delta CO4204-9J | Practical introduction to control technology CO4204-8J | Pneumatics CO4205-5E | Common rail diesel injection system CO4204-6X | Comfort systems and keyless entry CO4204-6G | | UniTrain interface |
| EloTrain 2-mm plug-in system | Circuit design using NI Multisim SO4204-5U | Sequential circuits SO4206-1G | Transient processes in DC and AC networks CO4204-3B | Asynchronous machines CO4204-7T | Pulse modulation methods, PTM CO4204-9K | Servo motor technology CO4204-8H | Electropneumatics CO4205-5F | Traction control systems ABS/ASR/ESP CO4204-6W | Autoshop communications and RFID CO4205-1N | | EloTrain experimenter |
| DC technology CO4206-1A | PCB layout with NI Ultiboard CO4204-5V | Microcontroller PIC16F887 (Assembler programming) SO4206-9A | Fuel cell technology CO4204-3C | Synchronous and slip-ring machines CO4204-7V | Modem methods ASK, FSK, PSK CO4204-9L | | Hydraulics / electrohydraulics CO4205-8A | Wheel speed sensor technology CO4205-1F | DC-AC conversion in vehicles CO4204-6L | | EloTrain measurement accessories (bridge connectors and connection cables) |
| AC and three-phase technology CO4206-1B | EloTrain 2-mm plug-in system | 8 Bit Microcontroller PIC (UML programming) CO4205-7F | | Stepper motor CO4204-7W | AM / FM modulation / demodulation CO4204-9M | | | Airbag, belt tensioners and crash response CO4204-6Z | Hybrid drives in automobiles CO4204-6V | | Digital multimeter Max 10 |
| | Semiconductors CO4206-1C | Arduino UNO (UML programming) CO4205-7G | | Linear motor CO4204-7X | AM transmission and receiving technology CO4204-9N | | | EloTrain 2-mm plug-in system | Interlock in hybrid and electric vehicles CO4205-1H | | Recommended accessories |
| | Basic electronic circuits CO4206-1D | Supplement to CO4205-7G Industrial interface CO4205-7W | | Three-phase transformer CO4204-7Y | Data acquisition using RFID & NFC CO4205-4S | | | Fundamentals of electrical engineering in vehicles SO4206-1J | Battery disconnect unit in hybrid and electric vehicles CO4205-1J | | UniTrain storage case |
| | Optoelectronics CO4206-1E | 16 Bit Microcontroller dsPIC (UML programming) CO4205-7C | | BLDC / servo motors CO4204-7Z | Network technology and cybersecurity CO4205-4Q | | | | DC-DC step-up converters in hybrid and electric vehicles CO4205-1K | | Digital multimeter Multi 13S |
| | | 32 Bit Microcontroller ARM (UML programming) CO4205-7D | | | Introduction to microwave technology SO4204-9U | | | | DC-DC step-down converters in hybrid and electric vehicles CO4205-1L | | LabSoft Classroom Manager |
| | | Programming 32 Bit ARM Cortex M3 microcontroller (C programming) SO4206-9B | | | Supplement to SO4204-9U Waveguide components SO4204-9V | | | | Safe handling of HV systems CO4205-1M | | LabSoft Classroom Manager |
| | | DSP using microcontroller 32-Bit ARM Cortex-M3 (C programming) SO4206-9C | | | Antenna technology SO4204-9T | | | | Fuel cell technology in vehicles CO4204-6M | | Collections of assignments (for use with Classroom Manager) |
| | | FPGA - Design of circuits using VHDL SO4206-9E | | | Supplement to SO4204-9T Complex antenna systems SO4204-9Z | | | | Solar technology in vehicles CO4205-1P | | Electrical fundamentals |
| | | FPGA Altera Cyclone IV (Verilog) CO4205-7E | | | Microstrip technology CO4204-9Y | | | | | | Electronics |
| | | | | | | | | | | | Digital electronics |
| | | | | | | | | | | | Electrical power engineering |
| | | | | | | | | | | | Building management systems |
| | | | | | | | | | | | Automotive technology |

* 3 experimenters are required for extension with CAN bus course (CO4204-7K)
