

# TRAIN TECHNICIANS FOR THE MOBILITY OF TOMORROW

INSTITUTE OF THE  
MOTOR INDUSTRY

### IMI and Lucas-Nuelle join forces to deliver high quality training solutions for the automotive sector

The rapid growth in sales of high voltage vehicles means the skills and knowledge necessary to repair and maintain them is vital – **currently, less than 5% of technicians are qualified**. As manufacturers and insurers mandate compulsory training and certification, internationally recognised training and qualifications are key!

Lucas-Nuelle, the world's leading manufacturer of high quality training solutions have developed state of the art high voltage training solutions which include the world's only High voltage battery trainer to allow genuine 'inside the battery' measurement and diagnosis.

IMI qualifications are internationally recognised and developed in partnership with the sector to meet the requirements of all, from non-technical staff, maintenance and diagnostic technicians to recovery and rescue personnel. They serve to promote the values of TechSafe, part of the wider Campaigns for Change. To learn more about these campaigns, please visit: <https://www.theimi.org.uk/landing/campaign-change/>

The unique partnership between Lucas-Nuelle and the IMI ensures that your students gain the most up to date qualifications by training on the worlds best training equipment.

**The IMI and Lucas-Nuelle – together driving up standards.**

## ONE-STOP SOLUTION FOR THE MOBILITY OF TOMORROW

#### EV 1 Qualification

In Electric/Hybrid Vehicle Awareness
